IMPORTANT DATES

Pre-Congress Workshop - February 20–21, 2019  
Opening Ceremony - February 21, 2019  
Symposium & Scientific Eposter - February 21–23, 2019  
Exhibition - February 22–23, 2019

WELCOME MESSAGE

Dear distinguished colleagues,

On behalf of the planning committee, we would like to welcome you on the 16th Indoanesthesia 2019. This event will be held at IMERI–FKUI Building and Shangri-La Hotel in Jakarta, Indonesia. The Pre-Congress Workshops will be held at IMERI–FKUI Building and Shangri-La Hotel while the Symposium will be held at Shangri-La Hotel–Jakarta.

This meeting includes lectures, panel discussions, open question and answer, and interactive audience-response sessions in the field of anesthesia and intensive care medicine. We have invited many distinguished speakers who excel at their areas of expertise and working groups to share their knowledge and experience in anesthesia. It promotes top level research and to globalize the quality research in general, thus making discussions, presentations more internationally competitive and focusing attention on the recent outstanding achievements in the field of anesthesia, and future trends and needs.

We would like to express our sincere appreciation to all future participants, financial sponsors, exhibitors, and all the committee members who will make this 16th Indoanesthesia 2019 successful. We’re looking forward to an excellent meeting with great people from different countries all around the world and sharing new and exciting insights. Thank you and see you in Jakarta.

Warm regards,

Susilo Chandra, MD, FRCA

Invited Speakers

Alan C. Santos – USA
Alex Sia – Singapore
Alfred Chua – Australia
Alfredo N. Cattaneo – Argentina
Ali Shariat – USA
Altaan Sahin – Turkey
Anne-Sophie Bouthors – France
Andre van Zundert – Australia
Bhavani Kodali – USA
Belen De Jose Maria – Spain
Chandra Kumar – Singapore
Christopher Robards – USA
Darío Satoto – Indonesia
David Bogod – UK
Dedi Susila – Indonesia
Eicke Conner – USA
Efim Shiman – Russia
Eric Buchser – Switzerland
Ezzat S. Aziz – Egypt
Farnad Imani – Iran
Frédéric Mercier – France
Gabriella Bettelli – Italy
Grace Anne Banson Herbosa – Philippines
Hariharan Shankar – USA
Hermann Mellinghoff – Germany
Hülya Bilgin – Turkey
I.G.N. Maha Alit Ari B. – Indonesia
Javier Belda – Spain
John Marini – USA
Keiichi Tada – Japan
Ketut Ngurah Gunapriya – Indonesia
Kishor Gandhi – USA
Laura Clark – USA
Luc Sermeus – Belgium
Luc Tielens – Netherlands
Manoj Kumar Karmakar – Hong Kong
Manuel Galindo – Colombia
Martin Westphal – Germany
Mauricio Vasco – Colombia
Medge Owen – Turkey
Michael Paech – Australia
Monica Siaulytė – Brazil
Narinder Rawal – Sweden
Pedro Girao – Portugal
Peter Biro – Switzerland
Philip E. Bickler – USA
Pryambodho – Indonesia
Quirino Placevolo – Italy
Raafat S. Hanallah – USA
Rolf Rossaint – Germany
Roshan Fernando – UK
Roulac d’Arby Toledano – USA
Ruth Landau-Cahana – USA
Sabine Himmelseher – Germany
Samina Ismail – Pakistan
Sandeep Diwan – India
Sean Chetty – South Africa
Somrat Charuluxananan – Thailand
Stanley Wong – Hong Kong
Stephan A. Schug – Australia
Stephen Kinsella – UK
Stephen P. Gatt – Australia
Sugeng Wibisono – Indonesia
Sunil T. Pandya – India
Tom Van Zundert – Australia
Victoria Eley – Australia
Youri Vater – USA
Yosi Asmara – Indonesia
1. THE SPINE ULTRASOUND FOR INTERVENTIONAL PAIN MANAGEMENT  February 20–21, 2019
   Objective:
   1. Know using basic ultrasound.
   2. Know pit fall ultrasound of spine.
   3. Know anatomy of sacral, lumbar, thoracic and cervical.
   4. Know ultrasound caudal epidural, sacro iliacal joint, lumbar medial branch, lumbar transformaminal, quadratus lumborum muscle, psoas muscle, lumbar facet joint.
   5. Know ultrasound for neuroaxial block, thoracic facet joint, ultrasound for erector spine plane block, cervical facet medial branch block.

2. ADVANCE VASCULAR ACCESS (AVA)  February 21, 2019
   Objective:
   • Review principle factors in vascular access device selection.
   • Review protocol for daily assessment of the patient’s vessel health, condition and necessity for continued access based on best-evidence practices and guidelines.
   • Discuss indications and contraindications for central venous access.
   • Discuss risk and complications associated with central venous access.
   • Review product and component options for central venous access.
   • Review risk and complications averted with the implementation of ultrasound guidance for CVC and PICC insertion.
   • Review the vascular positioning system as a tool to help proper placement of CVC or PICC tip.
   • Practice insertion of CVC and PICC with ultrasound guided vascular access.

3. MASTERCLASS ON NEW INSIGHTS INTO ULTRASOUND IMAGING OF THE BRACHIAL PLEXUS AND RECENT REFINEMENTS IN BRACHIAL PLEXUS BLOCKADE  February 21, 2019
   Objective: After attending this Masterclass the attendee will have a sound understanding of the anatomy of the brachial plexus relevant for upper extremity blocks. The participants will be able to accurately identify the individual elements of the brachial plexus using ultrasound including the roots (C5–T1), trunks (upper, middle and lower), division, cords and the four major peripheral nerves (median, radial, ulnar and musculocutaneous) of the upper extremity. Effect of BPB techniques on hemidiaphragmatic function and its assessment using ultrasound will also be covered. Participants will be demonstrated, using pre-recorded videos, how to perform some of the newer and traditional upper extremity nerve blocks i.e. selective dorsal scapular nerve block, anterior suprascapular nerve block, selective upper trunk block, hybrid block (combined upper trunk and supraclavicular BPB), targeted supraclavicular brachial plexus block, costocostalBPB, lateral sagittal infraclavicular and axillary BPB.

4. MASTERCLASS ON THORACIC PARAVERTERBAL AND THORACIC INTERFACIAL NERVE BLOCK USED FOR ANESTHESIA AND OR ANALGESIA DURING MAJOR BREAST CANCER SURGERY  February 21, 2019
   Objective: After attending this Masterclass the attendees will have a sound understanding of the basics of thoracic paravertebreal block (TPVB) and Thoracic interfacial plane blocks (PECS and serratus plane block). Sonography relevant for TPVB and interfacial plane blocks will be demonstrated in volunteers and the mechanism of action, pros, cons and limitation of each technique will be discussed. Participants will also be introduced to the concept of “sub-pectoral plexus block”. Pre-recorded videos will be used to demonstrate how to perform these techniques. Hopefully this will build the foundation based on which the attendee can judiciously use these techniques for anesthesia and or analgesia in patients undergoing major breast cancer surgery.
Scientific Highlights

2019 update of the European guidelines for the bleeding trauma patient

"Abdominal wall blocks" (rectus sheath, TAP, ilio-inguinal, quadratus lumborum)

Anesthesia for CS in remote areas

Anesthesia for pelvic resection and reconstruction using 3D printing custom prosthesis—5 years experience at RRPAH

Anesthesia for liver transplantation

Anesthesia for non-obstetric surgery during pregnancy

Anesthesia for obesity: obese patients in non-OR-anesthesia

Anesthesiology in 2019: how were we? how are we now? where are we going?

Art and science in anesthesia

Avoiding lasting disability from ICU care (PICS syndrome)

Basic ultrasound guided regional anesthesia workshop

Complications of ophthalmic regional blocks

Consent and ethics

Depth to the epidural space—can we predict it

Developing national guidelines on obstetric anesthesia in low resource settings (highlighting our publication on the cover of anesthesiology in aug 2017—work in Armenia)

Does the choice of anesthetics impact on long-term outcome?

Drug premedication: should it be abandoned?

Enhanced recovery after cesarean delivery including judicious opioid prescription

Ensuring quality in acute postoperative pain management

Erector spinae plane block how and in what cases

Evolving role of TAP block

Expanding horizon for anesthesiologists: anesthesia, critical care and to medical care@HOME

Fibrinogen supplementation and tranexamic acid in post-partum hemorrhage

From the anesthesia to pain medicine

General anesthesia for caesarean delivery: changes in practice

Genetics and pain

Get to the point in intensive care medicine: the sooner the better

Hemodynamic control during spinal anesthesia for cesarean delivery: use of vasopressors

How deep is your block? Surgical safety and clinical relevance

How to best manage your patient in the perioperative period

How to optimize your ultrasound for regional anaesthesia - theoretical background and practical applications
Scientific Highlights

How to perform recruitment maneuvers and setting the optimal PEEP in the OR
How to prevent post-anesthesia residual neuro-muscular blockage
Improving maternal morbidity and mortality in low resource settings
Interactive technology in obstetric anaesthesia and analgesia
International standards for a safe practice of anesthesia
Ketamine for acute pain
Keys for decision-making about surgery in the elderly
Loco-regional anesthesia in children: not the same as in adults* (as complete as possible the differences in the use of loco-regional anesthesia in children and adults; anatomy, pharmacology, physiology)
Lung and airway ultrasound for anesthesiologists
Management of patients having awake craniotomies for speech mapping
Management of the anticipated difficult airway in obstetric patients
Medical decisions in anesthesia and intensive care
Medicolegal general
Monitoring nociception during TCI-TIVA
Multimodal pain management for enhanced recovery after surgery
Multiple systems failure (MSF)—anesthetic implications
Neurologic injury after neuraxial anesthesia and analgesia in obstetric patients
New concepts in the use of light guiding as an adjunct to tracheal intubation
Newer techniques for labor analgesia
Obesity—the BIG problem in anesthesia
Office based anesthesia and ambulatory anesthesia: is really safety a priority?
Oxygen for life and mitochondria; the role of the most essential ingredient in anesthesia
Pain and the microbiome
Percutaneous and minimal invasive procedures for spinal pain management: update and challenges
Perioperative medicine: myth or reality in ASEAN
Point-of-care testing: should it be used routinely in obstetric hemorrhage?
Precision medicine applied to obstetric anesthesia
Protective ventilation in the surgical patient
Recent advances and anesthetic considerations in corneal transplantation
Scientific Highlights

Refresher course: a modern and considerate use of muscle relaxants in 2018
Relevance of pathophysiological changes and anesthesia
Role of acute pain services to improve outcome
Role of anesthesiologist in ERAS protocols
Role of ICUs in obstetrics
Safety of anesthesia in pediatric patients
Safety of ultrasound
Selective regional anesthesia for major abdominal surgery
Shortening length of stay for cesarean delivery
Spinal cord stimulation update—wireless stimulation
The “peripoas block”—a novel alternative analgesic technique to lumbar plexus and fascia iliaca blocks
The “submultifidus block” for perioperative pain relief in spine surgery
The global challenge of pain education
The new flexible-tip bronchoscopes in airway management
The new guidelines for thromboprophylaxis in OB
The obese child for ambulatory surgery
The obese parturient: a lot to handle
The physiological and pathological changes in haemostasis during pregnancy and immediate postpartum
Thrombotic microangiopathy: an obstetric anesthesiologist's view
Time to ditch the PCA machine? Management of acute postoperative pain with oral opioids
Tissue oxygenation and clinical outcomes
Treatment options in chronic leg pain
Update in labor analgesia
Update on periooperative fluid therapy: as little as possible but not less
Update on the neurophysiology of pain
Update on ultrasound guided peripheral nerve blocks in children
Updates in local anesthetic systemic toxicity and treatment
What is the true mechanical cause of ventilator associated lung injury (VILI)?
Abstract Submission and Epother Presentation

The Organizing Committee is pleased to invite submission of abstracts to be presented at the 16th Indoanesthesia 2019.

**Epother Participant**
1. This competition is open to all students.
2. The abstract submission deadline for poster competition will be closed one month before the conference date (this is subject to change), hence all are requested to submit their abstracts well in advance.
3. The abstract should include complete details of the contestant (e.g., abstract title, name, affiliation, abstract, and biography, etc.)
4. Abstracts have to be submitted through online or by email. Shortlisted abstracts for the competition will be intimated through email and those will be displayed on the website as well.
5. If the registered author/poster presenter is unable to attend the conference he/she may send a substitute who can be a co-author (or) any member from the same institution. If the winner is a substitute, he/she will be awarded and not the registered author/contestant.
6. Opportunity for young researchers to learn about the research areas of their peers to increase their capacity as multidisciplinary researchers.
7. All shortlisted poster presenters have to be registered before the deadline of abstract submission.

**General Guidelines**
1. The format of the Epother must be JPEG format, portrait, resolution 1920×1080. Your file must be compatible with a PC.
2. Seek simplicity but informative, don’t overload the poster. Keep text to a minimum and avoid redundancies.
3. Use 500 to 1000 words (including title, figure legends, and tables), graphics such as figures and tables can effectively convey more information than text, and should cover not more than 50% of the poster area.
4. The title of the poster should be in capital letters.
5. The name of the author/researcher without any academic title.
6. Use 2 columns in the poster.
7. Use a constant font throughout the poster.
8. The systematic layout consists of:
   - Introduction: the background of your study/case report and the objective/aims/hypothesis—Methodology (for research study)
   - Result
   - Brief discussion
   - Conclusion: should directly address or answers the objective/aims/hypothesis—References
Registration and Accommodation Information

REGISTRATION PAYMENT

All registration fees must be paid by bank transfer. Registrant should bear all bank charges. Please send a copy of the transaction along with the registration to the Organizing Committee.

ON SITE REGISTRATION

Those who have not registered in advance may register at on site registration desk. Only cash payment in Rupiah will be accepted during on site registration. No refund will be made for on site registration fees.

HOTEL POLICY

Due to high demand on the hotel room at the time of congress, the congress secretariat strongly recommended early reservations.

ROOM RATE

Hotel rooms at special congress rate are being held for the congress participants at Shangri-La Hotel – Jakarta. All rate are indicated in Rupiah, per night and per room included breakfast for two persons. Reservations must be made through the congress secretariat to guarantee the indicated rates negotiates for the congress.

HOTEL RESERVATION

Hotel assignment will be made on a ‘FIRST COME FIRST SERVE BASIS’.
